# What is the Purpose of WCA's **MONDAY ASSEMBLY?**

Our weekly assemblies are an important part of school culture. We gather as a community each week for a variety of purposes: to allow houses time to compete and participate in other events, to discuss important informative topics, to complete service projects, to learn from special guests, or to participate in our Noema Lecture Series.

The Noema Lecture Series is an important part of school culture. Every few weeks the school community gathers to hear an interactive presentation or lecture from one of our faculty or an invited guest on the question of the year. The school seeks to ask and discuss the big questions together and to get the perspective of each academic department. One year, when there was an American History focus, the big question was "What does it mean to be an American?" Another example of our focus question is "What is the Good Life?" Our students benefit from the perspectives offered, from seeing their faculty as scholars and researchers who seek to provide excellent lectures, and from discussing and contemplating the material between gatherings.
